INTRODUCTION

Social scientists are focusing an increasing amount of attention on the social-psychological dimensions of the social mobility of youth. As a result, an extensive body of literature is accumulating on research efforts directed toward an understanding and explanation of the status projections (aspirations and expectations) of youth for attainment in a variety of status-areas. One of the problems facing the growing number of researchers investigating this problem area is that relevant research efforts are reported in a number of different publications representing diverse disciplines and agencies. A comprehensive listing of the rapidly expanding literature on status projections of youth is needed to guide researchers to sources of information that can be used to plan their studies and interpret their findings. This report is one of a series of three bibliographies that are intended to serve this need:

DIR 67-10*: A Bibliography of Literature on Status Projections of Youth: I. Occupational Aspirations and Expectations.

DIR 67-11*: A Bibliography of Literature on Status Projections of Youth: II. Educational Aspirations and Expectations.

DIR 67-12*: A Bibliography of Literature on Status Projections of Youth: III. Residence, Income, and Family Orientations.

*Texas A&M University, Agricultural Experiment Station,
Department of Agricultural Economics and Sociology, Departmental
Information Report.

The purpose of this series is to expand and up-date two previous bibliographic listings that we developed over the past 3 years and which are now out of print.¹ This report replaces the education section of DIR 66-7, A Bibliography of Literature on Status Aspirations and Expectations: Educational, Residence, Income, and Family Orientations. This new listing includes 323 citations on educational status projections, almost 100 more than the old listing.

Our long-range plans are to continually expand and improve upon these listings and to eventually provide selective structural annotations of the research reports cited. Several structured sets of annotations on occupational status projections have already been completed.² We seek the reader's cooperation in
